Adrian Plaisance, FENTON Communications, email: aplaisance@fenton.com

MASS Design Group is an architecture and design collective that researches, builds, and advocates for architecture that promotes justice and human dignity. A team of 140 people working in 6 cities across the world, MASS has built 21 healthcare and support facilities, with another 13 in construction and underway. In 2017, they won the Cooper Hewitt National Design Award and the National Arts and Letters Award. Their recent architectural projects include a Cholera Treatment Center in Haiti and the Memorial for Peace and Justice in Montgomery, Alabama.

Ariadne Labs is a joint center for health systems innovation at Brigham and Women's Hospital (BWH) and Harvard T.H. Chan School of Public Health (HSPH). Ariadne Labs is a growing community of researchers working toward a shared vision: for health systems everywhere to deliver the best possible care for every patient. Their approach begins with identifying critical failures that cause harm in the health-care system to then research, develop, test, and scale simple yet innovative interventions to address these failures.
